Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3632

This is the second Office action for serial application serial number 10/672,164, Fastening Unit for Securing Peripheral Component Interconnect Cards in PCI Slots in a Housing of a Computer, filed September 26, 2003.

Election/Restrictions

Applicant elects Species I, figures 3-8 and claims 1-9. This election is made with traverse. Claim 10 is withdrawn from consideration.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in this application filed on September 26, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,618,264 B2 to Megason et al. Megason teaches a fastening unit comprising a seat (42) and at least one pressing member (52). The seat is adapted to be mounted on

Art Unit: 3632

the frame and has at least two parallel mounting walls (not numbered) that define a mounting space (22) there between. The mounting space is adapted to receive a portion of one of the brackets (54). The at least one pressing member (52) has a pressing part (64,80) that is disposed in the mounting space and that is pivoted to the mounting walls so as to be rotatable relative to the seat between a pressing position and a releasing position. The pressing position is obtained such that the pressing part is adapted to press the portion of the one of the brackets against the frame. The releasing position is obtained such that the pressing part is adapted to be moved away from the portion of the one of the brackets.

Allowable Subject Matter

Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Swindler 5,317,483; Hastings 5,822,196 and Han 5,989,043 teach a rotatable latching mechanism for securing an object therein.
